Education

University Of Waterloo

Master of Engineering, Software Specialization GPA 3.7/4.0

Sep. 2022 – Dec. 2023

Waterloo, Ontario

University Of British Columbia

Bachelor of Applied Science in Electrical Engineering, GPA 3.8/4.0

Sep. 2016 – Apr. 2021

Vancouver, British Columbia

TECHNICAL SKILLS

Languages: Python, Java, C++, SQL

Technologies: Azure(AZ900, AI900, DP900 certified), AWS(EKS, ECR, Chalice, Lambda, IAM, S3, Dynamo DB, EC2), Elasticsearch, Kubernetes, Jenkins, Git, Docker, MapReduce, Spark, Flink, Kafka, Linux, Ansible

Experience

Site Reliability Engineer (eBusiness Service)

(Onsite) Austin, TX

Apple www.apple.com

Jul 2024 - Present

- Contributed to critical initiatives including SAP SLM expansion, leading 3 successful times Disaster Recovery, SSL AS2 Certificate Changes to maintain secure communications, and Kubernetes projects onboarding and admin
- Optimized Splunk queries for NPI preparation, demonstrating strong analytical and problem-solving skills
- Implemented a Model Context Protocol (MCP) server for Apache Solr with IDMS A3 token-based authentication, providing secure, automated access and flexible querying tools with built-in search patterns and filtering
- Developed and optimized CI/CD pipelines to automate deployments and ensure reliable software delivery for global business operations, saving **1000+ mins** per month cross all teams

Technology Consultant (Computer Science Domain)

(Remote) Waterloo, ON

Coursera www.coursera.com

Sep 2021 - Sep 2023

- Curated all computer science and information technology courses, improved the course recommendation system. Increased paid learner enrollment from **18.3% to 20.6%**, generating **millions USD** in revenue

Software Engineer Intern (Backend Team)

(Hybrid) Sunnyvale, CA

PepperData www.pepperdata.com

Apr 2023 - Aug 2023

- Integrated Java-based performance management services with **AWS ECR**, solved docker hub throttle issues and conducted integration tests across multiple accounts and regions
- Collaborated with the backend engineering team to leverage **Kubernetes** metrics to automate insights and recommendations. This reduced CPU and memory usage of each containers, and save up to 47% of cloud costs
- Implemented CI/CD pipelines using Jenkins, automating build, test, and deployment AWS policy update processes resulting in a time saving for 5+ hours per use

Software Engineer Intern (Data Product)

(Onsite) Calgary, AB

ExxonMobil corporate.exxonmobil.com

Jan 2020 - Aug 2020

- Designed and implemented real-time surveillance tools using **SQL**, **Python**, and **SeeQ** for 100+ oil pads, resulting in significant reduction of time delay (from 15min to 1min), with automated alerts generated, saving users 2 hours per day compared to the previous tool
- Developed a cost-effective dashboard with superior customization, and sensitive data handling capabilities that outperformed a multi-million dollar software, and improved the handling of high-frequency time series data
- Co-designed and implemented a critical COVID-19 tracking dashboard using Python, Github and SQL. This tool provide daily reporting to track affected individuals and generates comprehensive reports for the Alberta Provincial Health Service, significantly contributed to the shaping of regional health policies during a global pandemic

Software Developer Intern (Operation Research)

(Onsite) Vancouver, BC

UBC Center of Operating Excellence www.grad.ubc.ca/research-centre/centre-operations-excellence

May 2019 - Aug 2019

- Developed a more efficient course scheduling software system, addressing constraints and improving university resource usage and student experience using **R** and **Python**
- Built a **Python**-based supervised machine learning model to predict rainfall using historical rainfall data

Machine Learning Engineer Intern

Kelowna, BC

UBC Advanced Control Intelligent System LAB acis.ok.ubc.ca

May 2018 - Aug 2018

- Led a team of 3 to research and develop a deep-learning robot task system and used Python, OpenCV, and Numpy. This incorporated a novel data graph method with distributed computing. Published in 2019 ICRA conference paper
